## SUMMARY

---

Recently completed the Web Development and Database Administration and Development programs at Seattle Central College. Work for E.M.C Research and Development increased patient-base 24% from website traffic. User feedback also reported the site to be clear, concise, and easy to navigate.

Primary focus now in deployment of current technologies in all web sites and applications with planned room for growth. Proper practices in Search Engine Optimization (SEO), W3C validation standards and responsive design with ensured browser compatibility as far back as Internet Explorer 6. Exceptional skills in translating websites into WordPress, Ruby on Rails, and Laravel.

---
